

After fourteen years of research and writing, noted historian and author William G. Hartley is presenting to the world a monumental new work:

**Another Kind of Gold
The Life of Albert King Thurber
A Utah Pioneer, Explorer and Community Builder**

This excellent book is now available for purchase by the descendants of Albert King Thurber and others who value true historical works. This is a high quality hard bound book with gold lettering, a unique dust jacket, and library quality sewn binding that should last for generations.

In addition, an electronic version of the entire book is included free on a disk in the back of each printed book purchased. This disk also contains a wealth of material that any Thurber descendant will find extremely valuable including an electronic image of the entire original A.K. Thurber journal and transcription, manuscripts, letters, documents, photos and other pertinent information relating to A.K. Thurber, as well as histories, documents, letters, and photos relating to his wives and children.

The purchase price of each book mainly represents the cost of producing this work. Any proceeds beyond that will be used towards future family history projects.
